

Name: _____ Date: _____

Directions:

Think back to the three different rock groups we learned about on pages 12-19 of **Rocks and Minerals**: igneous, sedimentary, and metamorphic. Create a comic strip explaining how one of these rock types is formed. Be sure to include captions with your pictures to explain how the rock is formed.

Rock Formation Comic

Rock Type: _____

Answer Key

Rock Formation Comic

Rock Type:

Hot rock called magma is found under the Earth.	Volcano begins to stir.	Volcano erupts, pushing magma up from underground.
Magma is now called lava once it reaches the Earth's surface.	Magma cools down.	Cooled down magma is now igneous rock.
